

BALZER

BUCKHEAD PUMP FROM BALZER

The Balzer Buckhead Pump is a high volume, low pressure horizontal PTO pump. Its quality design and proven performance have made it a popular choice. This pump is direct drive with a PTO assembly available in 540 or 1000 RPM. It comes standard with a 20.5 inch welded steel impeller. One key feature of the Buckhead pump is the automatic "Power Priming System" which includes a vacuum pump. The tee manifold has one 4 inch and one 6 inch brass valve, each with handles and associated couplers. This pump is available with either a 6 inch or an 8 inch intake and outlets. It comes standard with a 16 ft. suction hose assembly.

Tee Manifold with one 4”
and one 6” brass valve

20.5” Welded Steel Impeller

STANDARD FEATURES

- Welded steel pump housing
